CAREVOLUTION

Implementation and reflection tool

Use this table to plan, document, and reflect on the measures you implement in your team. It helps you connect actions to goals, track status, and make informed adjustments over time.

Measure / practice implemented	Why this was chosen	Target group(s)	Planned start / duration	Progress / status	Next steps / adjustments

Use these prompts to reflect after filling out or revisiting the table:

- What's working well and why?
- Are some groups not using available measures? Why might that be?
- What support or resources do I need to take the next step?
- How can I share learnings or good practices with other managers?
